

## sentio Success Stories

### The Backstory

Our client used SENTIO in order to organize and prioritize 40,931 files. Three tags and a Non-Responsive category were defined in SENTIO by the subject-matter expert ("SME"), to complete the project.

### The Performance

From a universe of 40,931 documents, only 366 needed to be tagged for SENTIO to determine that 913 documents were "Responsive" (a ~2% Responsive Rate within the entire file population).

### The Highlight

**Speed** - The client was pleased that SENTIO determined over 40,000 documents as "Non-Responsive," therefore dramatically shortening the overall review process and saving them valuable time on a fruitless review.
